PROJECT-BASED TECHNOLOGIES

Vue Router, Tailwind CSS, Express.js, OpenAI API, React, TypeScript, Vite, pdf-lib, Scryfall API, Node.js test runner, Python, Vue 3, Node.js, Axios, Playwright, Markdown, YAML, Obsidian

PROFESSIONAL EXPERIENCE

Web Developer - WI Digital

July 2017 to June 2026

Worked on the continuous evolution of a commercial SaaS platform for digital multi-level marketing companies.

- Designed most system interfaces and rebuilt most of the responsive front end for administrative and end-user environments.
- Developed front-end and back-end features with PHP, JavaScript, MySQL, MongoDB, and a legacy CodeIgniter codebase.
- Maintained and extended REST API endpoints, business modules, customer integrations, and payment integrations.
- Worked with Git branches, pull requests, QA validation, Jira/Kanban, and API documentation updates.
- Built all system interfaces with Bootstrap 4 after the product upgrade from older Bootstrap versions.

Freelance Web Developer - Independent

2009 to 2012

Delivered small web projects primarily through referrals.

- Built websites, landing pages, and custom web solutions.
- Implemented responsive front ends from supplied designs.
- Developed and customized WordPress sites and maintained existing websites.

Additional Experience

- **Fazul Comunicação - Web Designer / PSD to HTML:** August 2015 to October 2015
- **Takestore - Web Designer / PSD to HTML:** August 2014 to November 2014
- **Agência EP2 - Web Developer:** January 2013 to October 2013

- **DHG Web Agência Interativa - Graphic Designer / Web Designer:** January 2011 to September 2011
- **DHG Web Agência Interativa - Graphic Designer / Web Designer:** February 2012 to January 2013
- **MQV Propaganda - Web Designer:** October 2011 to December 2011
- **StudioBR Desenvolvimentos - Graphic Designer / Web Designer:** March 2009 to December 2010

RELEVANT PROJECTS

JurAssist - personal project

Unpaid collaborative AI-powered legal assistant developed with two former colleagues.

- Designed and implemented the complete front end, from the landing page through application interfaces.
- Implemented registration and password-reset flows with JWT and email handling.

WIPag - professional

PIX integration project completed as part of regular WI Digital work.

- Implemented the complete administrative interface for PIX keys, API integrations, withdrawals, receipts, and related operations.

MTG Proxy - personal project

Client-side web application for creating printable Magic: The Gathering playtest cards from deck lists.

- Built deck-list parsing, multilingual card resolution, printing selection, preview, and retry flows using Scryfall data.
- Implemented configurable PDF export for multiple paper sizes, including crop marks, bleed, double-faced cards, deck-list pages, and playtest watermarks.

Card Collection Manager - personal project

Personal productivity and automation tool for an Obsidian-based trading-card collection, with Scryfall search, collection and tag management, Markdown vault operations, image downloads, and asset caching.

- Created an earlier Python implementation for managing Obsidian card files and Scryfall data, later refactoring it with pathlib, dataclasses, separated menu/action modules, and API error handling.

EDUCATION AND CERTIFICATIONS

- **English Certificate - C2 Proficient, 73/100 - EF SET:** Issued | June 2026

LANGUAGES

- **Portuguese:** Native
- **English:** C2 Proficient (EF SET certified); spoken practice in development
