PROFESSIONAL SUMMARY

Web Developer with 15+ years of experience building and evolving websites, commercial web applications, SaaS platforms, REST APIs, and customer-facing solutions. Strong background in PHP, JavaScript, Codelgniter, MySQL, MongoDB, responsive interfaces, integrations, and long-term product maintenance. Progressed from graphic and web design into front-end and complete web application development.

CORE COMPETENCIES

Web Development · SaaS Products · REST APIs · Responsive Interfaces · Front-end Development · Back-end Development · Business Rules · Payment Integrations · Customer Integrations · Legacy-System Maintenance · UI/UX Collaboration · Product Evolution

ESTABLISHED PROFESSIONAL SKILLS

Languages: PHP · JavaScript · HTML5 · CSS3

Front end: Bootstrap 4 · Tailwind CSS · SASS · jQuery · CSS Grid

Back end: Codelgniter · REST APIs

Databases: MySQL · MongoDB

Tools and workflow: Git · Jira · Kanban · Linux · SSH · Visual Studio Code

SECONDARY AND PROJECT EXPERIENCE

Vue.js · Express.js · Python · OpenAI API · WordPress · Axios

PROFESSIONAL EXPERIENCE

WI Digital — Web Developer

July 2017 – June 2026

- Contributed to the continuous evolution of a commercial SaaS platform for nearly nine years.
- Designed most system interfaces and rebuilt most of the responsive front end for administrative and end-user environments.
- Developed front-end and back-end features with PHP, Codelgniter, JavaScript, MySQL, and MongoDB.
- Maintained REST API endpoints, payment integrations, business modules, and customer-specific features.
- Built interfaces with Bootstrap 4 and used CSS Grid on dashboards and external pages when more layout freedom was required.
- Served as a primary team reference for responsive layouts, CSS, JavaScript, Bootstrap, front-end implementation, and UI/UX questions.
- Worked with Git branches, pull requests, QA validation, Jira/Kanban, and API documentation.
- Helped determine whether requested features belonged in the shared product core or should remain customer-specific.

Freelance Web Developer — Part-time

January 2009 – Present

- Deliver websites, landing pages, WordPress projects, maintenance, and custom web solutions.
- Implement responsive interfaces from supplied designs and provide front-end or back-end development as required.
- Integrate APIs and content-management systems and enhance existing websites.
- Most freelance work has come through referrals and friends.

Earlier Professional Experience

Web Designer / PSD to HTML: Fazul Comunicação; Takestore

Web Developer: Agência EP2

Graphic Designer / Web Designer: DHG Web Agência Interativa; MQV Propaganda; StudioBR Desenvolvidos

Earlier roles included original and supplied design implementation, responsive front-end work, PHP websites, and digital marketing assets.

SELECTED PROJECTS

JurAssist

Collaborative AI-powered legal assistant platform. Contributed front-end interfaces, an Express.js back end, OpenAI API integration, feature development, and the landing page.

Technologies: Vue.js · Tailwind CSS · Express.js · MongoDB · OpenAI API

WIPag

WI Digital PIX integration project. Contributed front-end development and responsive implementation with Vue.js and Bootstrap.

Candidate Tracker — Professional Development Project

Production-style learning project used to expand the modern TypeScript ecosystem through hands-on work.

Practised in the project: TypeScript · React · Next.js · PostgreSQL · Prisma · Docker · Vitest

LANGUAGES AND CERTIFICATION

Portuguese: Native

English: C2 Proficient — EF SET Certified, 73/100
