PROFESSIONAL SUMMARY

Web Developer with 15+ years of experience and a full-stack background building and evolving commercial web applications, SaaS platforms, REST APIs, responsive interfaces, business rules, databases, and integrations. Nearly nine years of continuous product work using PHP, JavaScript, MySQL, and MongoDB, supported by a design-to-development career progression.

CORE COMPETENCIES

Full-Stack Web Development | SaaS Products | REST APIs | Responsive Interfaces | Front-end Development | Back-end Development | Business Rules | Payment Integrations | Customer Integrations | Legacy-System Maintenance | UI/UX Collaboration | Product Evolution

ESTABLISHED SKILLS

Languages: PHP | JavaScript | HTML5 | CSS3

Front end: Bootstrap 4 | Tailwind CSS | SASS | jQuery | CSS Grid

Back end and APIs: PHP | REST APIs | Business-rule Implementation

Databases: MySQL | MongoDB

Tools and workflow: Git | Jira | Kanban | Linux | SSH | Visual Studio Code

ADDITIONAL PROFESSIONAL AND PROJECT EXPERIENCE

Vue.js | Express.js | Python | OpenAI API | WordPress | Axios

PROFESSIONAL EXPERIENCE

WI Digital - Web Developer

July 2017 - June 2026

- Evolved a commercial SaaS platform for nearly nine years across administrative and end-user portals, product and user management, dashboards, commissions, payments, integrations, and customer-specific functionality.
- Created most system interfaces and rebuilt most of the responsive front end, standardizing implementation on Bootstrap 4 and applying CSS Grid to complex dashboards and external pages.
- Delivered front-end and back-end functionality with PHP, JavaScript, MySQL, MongoDB, and a legacy CodeIgniter codebase.
- Extended REST APIs, business modules, customer integrations, and Brazilian payment integrations including PagSeguro, PagueLeve, and PIX-based providers.
- Served as a primary team reference for responsive layouts, CSS, JavaScript, Bootstrap, front-end implementation, and UI/UX questions.
- Helped determine whether requested features belonged in the shared product core or should remain customer-specific.

Freelance Web Developer - Part-time

2009 - 2012

- Delivered small websites and custom web projects, primarily through referrals during the early career.
- Translated original and supplied designs into responsive interfaces and built PHP or WordPress solutions.
- Integrated APIs and content-management systems and enhanced existing websites when required.

Earlier Professional Experience

- **Fazul Comunicação:** Web Designer / PSD to HTML (Aug-Oct 2015)
- **Takestore:** Web Designer / PSD to HTML (Aug-Nov 2014)
- **Agência EP2:** Web Developer (Jan-Oct 2013)
- **DHG Web Agência Interativa:** Graphic Designer / Web Designer (Jan-Sep 2011; Feb 2012-Jan 2013)
- **MQV Propaganda:** Web Designer (Oct-Dec 2011)
- **StudioBR Desenvolvimentos:** Graphic Designer / Web Designer (Mar 2009-Dec 2010)

Earlier roles included original and supplied design implementation, responsive front-end work, PHP websites, and digital marketing assets.

SELECTED PROJECTS

JurAssist

Unpaid collaborative AI legal assistant project (Oct 2024-Apr 2025). Owned the complete front-end design and implementation, spanning the landing page, authentication flows, subscription dashboard, assistant chat, file uploads, and legal-model management. Built JWT/email registration and password reset, extended the Express.js API, and adjusted OpenAI integrations for chat and document analysis. Publicly deployed and tested by lawyers.

Technologies: Vue.js | Tailwind CSS | Express.js | MongoDB | OpenAI API

WIPag

WI Digital PIX integration project (Feb-Nov 2021). Delivered the complete administrative interface for PIX keys, API integrations, withdrawals, and receipts, and translated an externally supplied landing-page design into Vue.js and Bootstrap. Adopted across the SaaS systems of approximately 7-9 active clients and still observed in use through June 2026.

Candidate Tracker - Professional Development Project

Production-style learning project with complete Company and Job Opportunity workflows, used to expand the modern TypeScript ecosystem through hands-on work.

Practised in the project: TypeScript | React | Next.js | PostgreSQL | Prisma | Docker | Vitest

LANGUAGES AND CERTIFICATION

Portuguese: Native

English: C2 Proficient - EF SET Certified, 73/100
